Cooperative Spirit Continues

to a common belief in the value of having a GIS Master Plan.

PlanGraphics Overview

- GIS and Spatial IT Consulting Firm since 1979
- Over 1,500 client projects
- Core services include:
 - Assessment, Design, and Planning
 - Desktop/Workstation/Web Application
 Development
 - Database/Systems Integration
 - Customer Support/Training

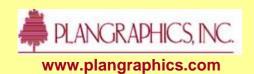

Master Plan Process

- Review of Background Materials
- Preparation and Distribution of Data Collection Forms
- Participating Agencies Prepare Responses
- On-site Interview Sessions
- Recommend Organizational Structure
- Draft Master Plan
- On-site Workshops
- Final Master Plan

Goals of Master Plan Development

- Provide an exemplary model for future City-County GIS Operation
- Identify a support organization for increased coordination that is effective, creative and cost-conscious
- Address new technology developments
- Increases involvement by other government and regional parties
- Identifies opportunities to streamline business practices

Key Issues Affecting Implementation

- Expanded collaboration among City, County, and external agencies and private sector
- Data reconciliation and integration
- Opportunities to create efficiencies that should result in time savings and cost avoidance
- Increasingly complex technology environment
- Rising public and agency expectations
- Data quality control and assurance
- Enhanced data security and accessibility
- Staff development

Immediate Recommendations

- Hire GIS Program Coordinator
- Create Unified Land base
- Identify and Pursue Additional Sources of Funding
- Expand GIS Participation

Next Steps in the Project

	3Q05	4Q05	1Q0	6	2Q06		3Q06		4Q06		1Q07		2Q07
